Coding, written — 90 seconds (practice answers: 5 2 6 4 1 3)

Compare the booklet with the answers below. Slash every wrong or skipped box and mark the last box reached at 90 s. A mistake with the right number written beside it counts as correct. If the person finishes all 108 boxes before 90 s, write the finishing time:

___ s Mode: ☐ written ☐ spoken (only if writing is physically hard)

Row	1	2	3	4	5	6	7	8	9	10	11	12
1	1	6	5	2	3	1	2	3	2	6	1	3

Boxes reached	Wrong or skipped	Correct in 90 s

Observations (often as useful to a doctor as the score)

☐ Needed instructions or a practice item repeated	
☐ Lost track of a question midway / re-read many times	
☐ Much slower than expected, but careful	
☐ Fast but careless errors on easy items	
☐ Word-finding trouble or odd answers given confidently	
☐ Tired, frustrated or upset (when?)	
☐ Hearing or vision seemed to limit performance	
☐ Other notes
